Summary

I'm Mark, a dedicated Front End Developer with over 3 years of experience, currently seeking opportunities to contribute my skills to innovative projects. I hold a BSC in Computer Science and specialize in React JS, applying strong UI/UX principles.

In my current role, I've successfully developed web portals enhancing team management and facilitating user access to financial services. My expertise includes collaborating with designers to create user-friendly interfaces, managing multiple projects, and addressing legacy code challenges.

I possess a solid foundation in JavaScript (ES6+), React, Next.js and Redux, complemented by proficiency in HTML/CSS. I am well-versed in using tools like Webpack, Babel, and ESLint, and have commercial Git experience. I use unit testing tools like Jest/Enzyme and Jenkins for CI/CD pipelines during deployments.

Beyond the required skills, I bring valuable experience in interaction design and UX, and I'm adept at prototyping using various methods. My continuous pursuit of learning is demonstrated by staying abreast of industry trends and actively engaging in tech events as both a writer and speaker.

Experience

Software Engineer
Safaricom PLC

Jan 2023 - Present (1 year)
